

Simply Stainless Certificate of Sustainability

Simply Stainless & Simply Bars are the brand names of the modular stainless steel product designed for the hospitality, healthcare and resource sectors that are distributed throughout the world.

The product is sold extensively throughout Australia, New Zealand, the United Kingdom, the Middle East, Indonesia, South Africa and Papua New Guinea.

Simply Stainless is owned by an Australian company called CI Group Pty Ltd which itself is part of a wider family group of businesses that are leading the way in sustainable practices. One of the businesses in the group is an accredited Carbon Neutral organisation which offsets its carbon by investing heavily in bio diversity in Indonesia, where Simply Stainless is made.

CI Group Pty Ltd own 50% of the factory that Simply Stainless is manufactured exclusively in. This factory is aware of the environmental impact manufacturing has on our environment and has strict policies around mitigating this impact through our ISO9001 accreditation.

Some of the steps Simply Stainless is taking to improve our carbon footprint are –

1. Using fully recycled and recyclable cardboard in our packaging
2. Using raw stainless steel material that is 95% recycled
3. All sink wastes, beer stations and jug rinses are WaterCorp and Watermark Approved
4. Factory maintains an ISO9001 accreditation
5. Part of a Group of Companies with Carbon Neutral accreditation
6. NSF accredited for the North American market
7. Actively pursuing through R&D funding any opportunity to reduce our footprint
8. Incorporating feedback from customers, suppliers, and other stakeholders regarding sustainable practices

Please contact us for more information on any of the above.
